

THE WORLD'S ***SPOKEN*** KNOWLEDGE
...IS NOW "KEY-WORD SEARCHABLE"

Google™ transformed the world,
by indexing the world's “**TEXT**”.

Still... at least half of the world's knowledge
(in the form of “audio” — ***SPOKEN*** WORDS)
remains totally invisible to Google™

Today's best search engines
can index knowledge in this format:

The **learning** and **knowledge**
that we have is, at the most,
but little compared with that
of which we are ignorant.

-Plato

...but NOT in this format:

Leveraging advanced voice biometric
& blockchain technologies...

Transcriber.wiki™

...has embarked on the ambitious effort
to index “the other half” of the world’s knowledge-base:

Our “*spoken*” knowledge.

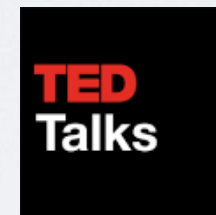

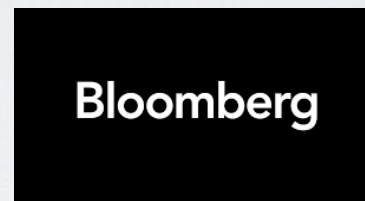

Transcriber.wiki™ is currently the **largest** publicly searchable database of transcribed audio/video — now with over **50,000** records:

✓ University Lectures

✓ National Newscasts

✓ Popular Podcasts

✓ Independent "Vlogger" Posts

...and ***thousands*** more!

All this spoken knowledge is now **exclusively** “key-word searchable”

@Transcriber.wiki™

“There is **a treasure trove of “dark data”** that lives beyond the basic metadata and analytics of video content and services. “ — David Mowrey (IBM Watson Media)

OPPORTUNITY

Seeking Investment: US 250,000

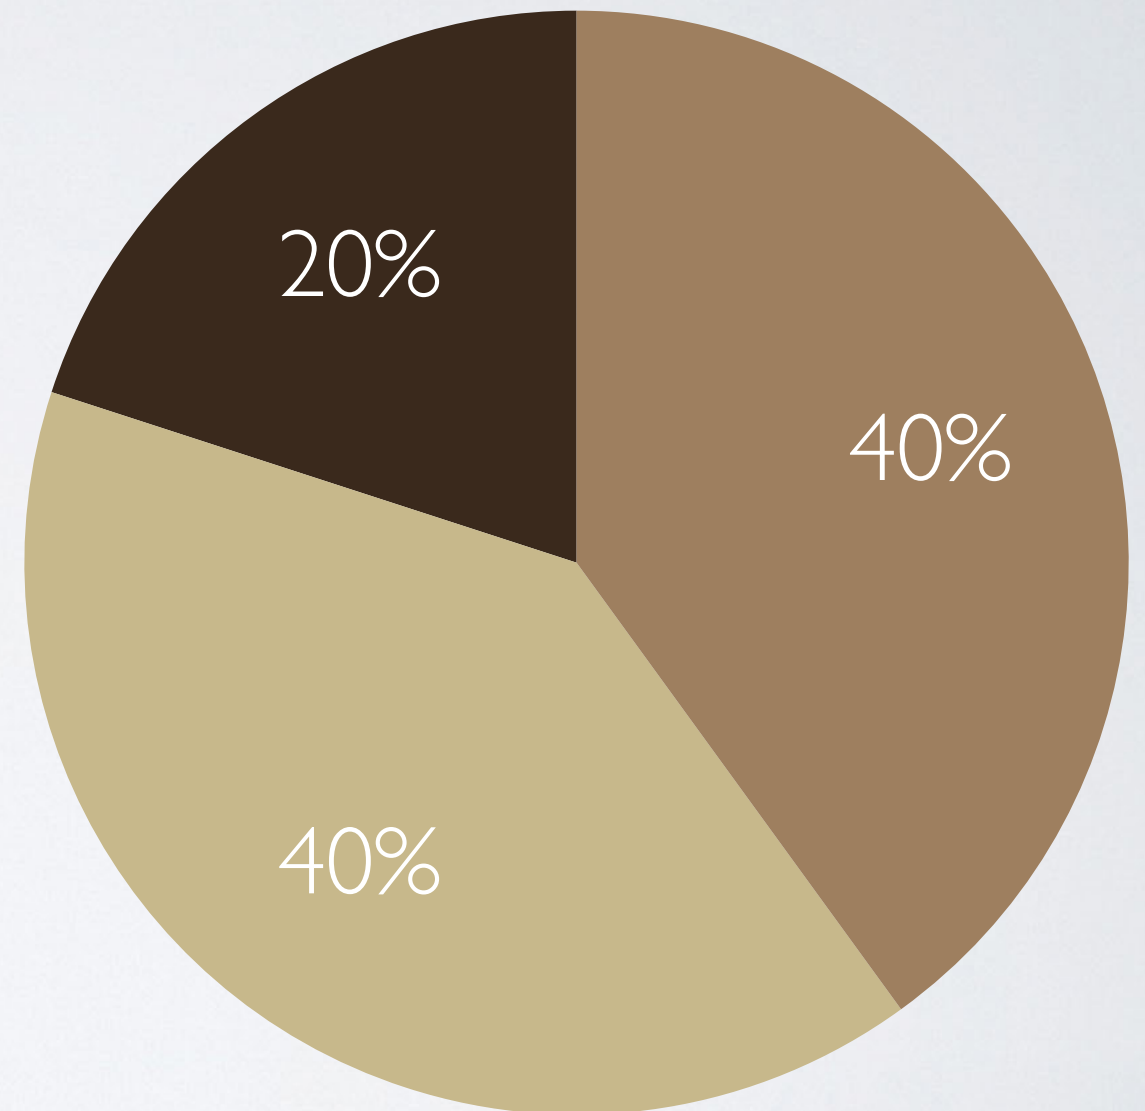

Business Models:
